SUMMARY

Final-year CS undergrad (AI/ML specialization) with experience from a full-stack internship and production-grade personal projects spanning real-time systems and AI integration. Proficient in Next.js, Node.js, FastAPI, Redis, and BullMQ, with experience building WebSocket-based concurrency, job queue pipelines, microservices, and REST APIs with JWT authentication. Looking for a software engineering internship where I can contribute from day one.

EDUCATION

JECRC University

Bachelor of Technology in Computer Science – AI/ML Specialization | **CGPA: 7.06**

Jaipur, Rajasthan

2023 – 2027

EXPERIENCE

LaVelda Coffee Beans LLP

Software Development Intern

Remote

Apr 2026 – Jun 2026

- Collaborated with the development team to build a full-stack web application for a coffee beans business using Next.js, Express.js, Prisma, and PostgreSQL, delivering a responsive storefront backed by REST APIs.
- Implemented authentication, relational database schemas, and Redis-based caching for high-traffic endpoints, improving average API response time by 35%.
- Containerized services with Docker within a microservices architecture and collaborated directly with stakeholders to scope and ship features against business requirements.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, C++
Frontend	Next.js, React.js, Redux, Tailwind CSS, Framer Motion, Responsive Design, HTML, CSS
Backend	Node.js, Express.js, FastAPI, REST APIs, WebSockets, Microservices, JWT Auth, BullMQ, Zod
Databases & ORM	MongoDB, MongoDB Atlas, PostgreSQL, MySQL, Redis, Supabase, Prisma
DevOps & Tools	Docker, CI/CD, Git, GitHub, AWS (S3, EC2), Unit Testing
Soft Skills	Problem Solving, Team Collaboration, Communication, Adaptability

PROJECTS

Planex | *Next.js, TypeScript, Node.js, PostgreSQL, Redis, BullMQ* | GitHub

Mar 2026 – Present

- Built an AI-powered project planning platform that generates requirements, DB schemas, API specs, and folder structures from natural language prompts via LLM integration; uses Passport.js for authentication.
- Engineered async job pipelines with Redis and BullMQ for concurrent LLM request processing, cutting response latency by 60% at 200 req/min.
- Implemented Redis caching on repeated PostgreSQL queries, reducing redundant query execution time by 40%.

Quick Split | *Next.js, Node.js, Python, MongoDB, FastAPI, WebSockets* | [Live](#) | GitHub

Jan 2026 – Apr 2026

- Developed a real-time expense management platform with WebSocket-based live updates, flexible splitting modes, and support for 200+ concurrent rooms; authentication handled via NextAuth.
- Integrated Groq LLM for AI-powered expense categorization, reducing manual effort by 65%; exposed results via REST API endpoints.
- Built FastAPI microservices for anomaly detection and risk prediction achieving 80% accuracy.

CERTIFICATIONS

Machine Learning Specialization | *Andrew Ng, Coursera*

Jan 2026

Node.js – The Complete Guide (REST APIs, GraphQL, MVC) | *Udemy*

Mar 2025

React – The Complete Guide (incl. Next.js, Redux) | *Udemy*

Jan 2025

EXTRACURRICULAR ACTIVITIES

JECRC Innov8 Hackathon | *Participant*

Sep 2024

- Built a telehealth platform frontend in Next.js featuring doctor appointment booking and real-time symptom analysis via the Gemini API.
